8. CONTACT

This brochure provides insights into Open World Alliance as an introduction to our core operational model, vision and activities.

Information correct at time of writing in January 2023.

INTRODUCTION

WHO WE ARE

Open World Alliance is an organization supporting the development of a global network of social innovators, pioneering organizations, creative entrepreneurs, community builders, solutionaries and sustainability specialists dedicated to accelerating positive planetary transformation.

We are co-creating with the growing regenerative movement of change-makers who are collectively calling to consciously steward a brighter future that benefits people and planet.

Welcome to

OWA

CHALLENGE

We stand today at a crucial point in human history, witnessing multiple planetary life support systems at tipping point. Converging crises of climate destabilisation, environmental degradation, biodiversity loss, fossil fuel dependency, destructive economics, failing governance and a fractured disconnected society have exposed friction points in our fragile systems that are being disrupted, overwhelmed and breaking down.

Many innovative and viable systemic solutions have been developed and are ready for implementation but are rejected by current prevailing operating systems designed for power and profit. Governmental systems, corporate structures and global currency models run a program that has led us into a life of imbalance and disharmony. Lack of funding, public awareness and obstacles that deter major change continue to thwart efforts that could ultimately relieve planetary suffering.

We are amongst many who recognise the urgency and magnitude of these cascading impacts and the shortcomings of current mainstream systems to address these complex global challenges.

YESTERDAY'S
SOLUTIONS
NO LONGER
WORK

VISION

We envision a world transformed through a pioneering new paradigm of conscious evolution and planetary health regeneration, that gives life to a thriving planet that truly works for all.

It's time to leap forward into a Gaia-centered Regenerative Renaissance that activates the conscious evolution of our social systems to work in dynamic equilibrium with natural law.

ANOTHER
WORLD IS
POSSIBLE

“THE BEST
WAY TO
PREDICT THE
FUTURE IS TO
CREATE IT.”

PETER DRUCKER
(1909 - 2005)

MISSION

OWA's mission is to redefine, transform and synergize business, finance and social systems through the integration of next-generation tools, technologies and thinking to advance a regenerative future.

We embrace the potential within today's systemic challenges as a catalyst for transition and are committed to leveraging the unprecedented opportunity at this great threshold of humanity. It's time to turn a new page, reimagine and reorganize. This is a watershed moment and the next decade will be decisive.

OWA operates as an imaginative catalyst, generating strategic insight and bringing a holistic overview to the complex operating environment of the 21st century.

THROUGH FUSING

NEXT-GENERATION
SOLUTIONS TO
TODAY'S BIGGEST
SOCIAL AND
ENVIRONMENTAL
PRESSURES

VALUES

We take inspiration from nature and the principles of biomimicry.

Nature has been successfully road-testing systemic innovation for millennia and holds deep wisdom in her biological blueprints.

LET NATURE BE OUR TEACHER

Principles of natural living systems are adopted as we:

- ✿ Commit to regenerative development - a model that evolves beyond sustainability and seeks to actively reverse environmental degradation and positively reinforce vital living systems.
- ✿ Adopt circularity in our funding models to reinforce and amplify cycles of benefits.
- ✿ Understand the dynamic interdependence of living systems in radical collaboration and synergistic integration for collective thriving.
- ✿ Value the strength and resilience in diversity, as we seek to embrace multiple perspectives.
- ✿ Recognise the fractal nature of living systems as applied to our methods and practices.
- ✿ Respect the self-organization of living systems in our appreciation of the autonomy of OWA allies.
- ✿ Honour service in the larger purpose of our commitment to working for the greater good of people and planet.

AS ABOVE SO BELOW, AS WITHIN SO WITHOUT

Our core values are deeply anchored in these foundations of nature in how we operate, work together and co-create with others.

OUR APPROACH

FUTURE-FOCUSED

OWA is a mission-driven, solutions-focused organization that invests in the future. As we enter a fundamentally new era, our narrative of what constitutes a better world needs redefining and reshaping.

TRANSDISCIPLINARY

Successful collective thriving depends on an interconnected approach that goes beyond individual silos. OWA is purposely positioned across multiple sectors to provide an integral lens for a more cohesive vision. We draw upon expertise from numerous fields including environmental regeneration, community development, systems thinking, finance, technology and data analytics amongst others.

CONNECTIVITY

OWA plays a facilitatory role in pro-actively encouraging constructive next-level collaboration between change-makers to strategically coordinate skills, talent, expertise and resources to empower more effective action. We adopt the principles of holistic systems co-creation through synthesizing diverse perspectives from the collective intelligence to unlock more inclusive and enlivening solutions to complex challenges.

MULTIFACETED

OWA embraces the continuous organic evolution at the growing edge of innovation, working at multiple levels of scale, from the smallest details to the bigger picture, addressing both short-term demands and long-term vision from multiple lenses. We operate a lean and agile business model to effectively navigate today's world of uncertainty.

ALLIANCE MODEL

DECENTRALISED ALLIANCE

Many of the solutions we seek to catalyze can only emerge through immense collective effort of diverse agents operating together. OWA is working towards developing as a distributed, decentralised alliance of multiple autonomous individuals, organizations and networks driven by a shared vision of a regenerative future.

CO-CREATIVE PARTNERSHIPS

We operate as an action-catalyzer, supporting and facilitating the emergence of numerous co-creative partnerships evolving through a principle of alignment. Our small team at the heart of OWA operations collaborates and co-creates dynamically with a range of specialists across diverse fields of expertise, bringing a holistic overview to our projects. We work with allies internationally through this distributed approach for a combined bottom-up and top-down strategic approach to developing solutions.

COHERENT NETWORKING

A membership model is in development to facilitate coherent networking of agents as we expand ahead to engage with the wider community. This partnership model and the OMNI OS Co-Creation Platform will support future co-creative endeavours as part of an alliance of global partners collectively developing solutions for planetary health transformation.

CORE FUNCTIONS

OWA is contributing solutions to current challenges to achieve our future vision, offering unique value towards the collective effort through key areas of intervention including:

SOLUTIONS

STRATEGIC ALIGNMENT

New levels of communication and co-creation between key interdisciplinary change-makers is essential.

- OWA connects leading-edge innovators in strategic partnerships to pro-actively encourage multi-disciplinary communication, unlock creative new insights and shape better decisions.
- Facilitates practical collaboration to reduce duplicated efforts and increase high-impact solutions.
- Contributes experienced strategic planning, meta-architecture and project management to leverage resources and co-ordinate targeted implementation of tools and technologies for maximum disruptive and transformative impact.

TECHNOLOGY SOLUTIONS

Effective global collaboration requires accurate information obtained from trusted comprehensive sources to quickly locate ecosystem data.

- OWA is facilitating, developing and stewarding with partners interoperable intelligent holonic data systems, platforms and co-creation tools that are distributed, decentralised and agent-centric, incorporating cutting-edge AI data management solutions. This will facilitate exchange of information and expertise to enable individuals, organizations and networks to share resources, more effective co-creation and support ecosystem adaptation and scaling.

SOCIAL CHANGE SOLUTIONS

Societal transformation requires new frameworks, methodologies, processes and practices to successfully implement a New Earth operating system that is inclusive, scalable & sustainable.

- OWA is developing and stewarding with partners structured social innovation systems and community engagement strategies to educate and empower people to embrace beneficial new behaviours, enable a more collaborative playing field and transform the way individuals, organizations, communities and societies perform, adapt and thrive in the New Earth paradigm.

There is no single approach to systemic change. The development of viable and sustainable planetary resilience requires addressing multiple aspects at every level, from top-down to bottom-up and from the local to the global.

IT'S TIME TO
REINVENT THE WORLD
LET'S GET STARTED

SUSTAINABLE FUNDING & RESOURCE SOLUTIONS

Outdated extractive and exploitative economic systems need to be replaced with regenerative and equitable economic practices that better serve society and planet.

- OWA is developing alternative funding solutions to give aligned co-creative allies the financial firepower they need to move quickly, bring projects to life, optimise self-organization and incentivize sustainability.
- Strategically distributing funding, grants and resources to catalyze projects, technologies and innovations that conserve and restore natural ecosystems to accelerate regenerative transformation.
- Exploring alternative economic models that redesign value and resource-based economic systems with better alignment between finance, society & environment.

EDUCATION & GAMING SOLUTIONS

Novel methods of engaging audiences are required to inform, educate and shift mindsets of future generations in creative, accessible and impactful ways.

- OWA is exploring the gamification of complex ideas and regenerative solutions with a number of game design specialist partners.
- Systems will integrate with OWA tools as interactive, interoperable gaming and educational platforms.

COMMUNITY & MEMBERSHIP

OWA is contributing to the emergence of a positive new paradigm through a variety of avenues including:

- Building engaged and synergized grassroots community networks to amplify momentum, collective action and movement building.
- An upcoming membership programme with financing opportunities to incentivise progress towards greater sustainability.
- Raising awareness and inspiring a progressive vision towards the new narrative of innovation and planetary regeneration.

AREAS OF PRODUCTION

Key foundational infrastructure pieces currently under construction by OWA and partners include:

NOTE:

Future timescale estimates reflect current projections and may be subject to change.

All systems developed to be integrated with next-generation web 3.0 being developed by OWA associates.

SYNERGY OS

WHAT: A framework to assist multi-stakeholders involved in new paradigm projects to effectively synergize, co-create and steward projects together effectively and in alignment.

WHY: Complex interrelated global issues require diverse multiple agents working together as an intelligent coherent whole. The Synergy OS framework provides a supportive process to align individuals and organizations to operate coherently and facilitate emergent solutions.

DETAILS: A comprehensive framework consisting of digitalised profile forms, questionnaires, templates, educational materials and facilitated workshops. It will form part of the foundational processes for the OMNI OS Co-Creation Platform.

HOW: Designed and piloted by OWA, inspired by multiple sources. Phased approach, starting with digital online processes and evolving into online and in-person facilitated workshops.

FOR WHOM: For any organizations worldwide interested in co-creative ventures with others.

ACCESS: Currently available to organizations

engaged in projects with OWA, following the relevant agreement fields. Future availability to other organizations.

FUNDED: Project funded by Higher Status Global.

TIMESCALE: Currently testing prototypes in pilot phase with associated organizations. Delivered and tested in iterative phases across 2023.

EXAMPLE USE: For multiple stakeholders to effectively co-create, develop solutions, steward projects, build communities and coordinate coherent ecosystems.

REGENYSIS.EARTH

WHAT: A smart interoperable search engine which builds intelligent profiles of information relating to social and environmental regeneration (eg. clean/green technologies, funders, projects, resources, case studies etc.)

WHY: To source accurate and up-to-date information and expertise across multiple sectors (eg. agriculture, permaculture, waste management, energy solutions and innovative scientific developments etc.) to engage and implement effective regenerative solutions for healthy environmental conditions on a macro level.

DETAILS: A standalone system that will be integrated into the OMNI OS Co-Creation Platform. It will incorporate cutting-edge AI solutions and a geo-location system utilizing satellite information to match information specific to location and bio-region for next-level project implementation. Further iterations will allow effective 'vital signs' monitoring to assess planet 'life status', creating social acupuncture points for regenerative action.

HOW: Constructed between multiple partners including OWA, Regenerosity, Lush, Regenerative Living Institute, SEEDS, Integrity, Earth, Darttek & others TBC. Project managed by OWA.

FOR WHOM: Available to all players worldwide. Expected to be of particular use to individuals and organizations in the regenerative movement and potentially public policy makers.

ACCESS: Freely available as contribution to the global intellectual commons.

FUNDED: Technology build and project management funded by Higher Status Global.

TIMESCALE: Started 2022. Anticipated completion: 2024

EXAMPLE USE: How to target and deploy resources most effectively and match funders to projects to maximise regenerative impact.

OMNI OS CO-CREATION PLATFORM

LAUNCH VERSION 1

WHAT: An interoperable socio-technological platform and operating system for new paradigm projects, partners, skill-sets and solutions.

WHY: To facilitate faster, more efficient and structured exchange of information and collective intelligence. To enable more effective communication and co-creation between individuals, organizations & communities worldwide by helping move co-creators through stages of coherency & competency as they learn, align & embody evolutionary business practices to support & scale societal transformation.

DETAILS: Will address numerous key areas (eg. decentralised social & technological architecture, governance infrastructure, new economic systems, legal structures & community management tools etc.) Parts integrated using sovereign identity systems, incorporating whole systems-thinking social design for effective alignment and a more unified field.

HOW: Construction coordinated and co-created between multiple partners. Individual parts at various stages of development from planning to already coded. V1 is not a fully mature system but an MVP container operating system to facilitate coordination of activities in the immediate term. All partners involved in V1 are clear that other agents have systems designs

and architectures that will inform the design and delivery of the overall operating system. V1's modular and lightweight design will enable these different groups to contribute in further rounds of co-creative development once more tools are in place to organize with greater efficiency and scale. Iterative build process with versions successively tested and refined into a scalable communications infrastructure, advancing towards larger planetary level.

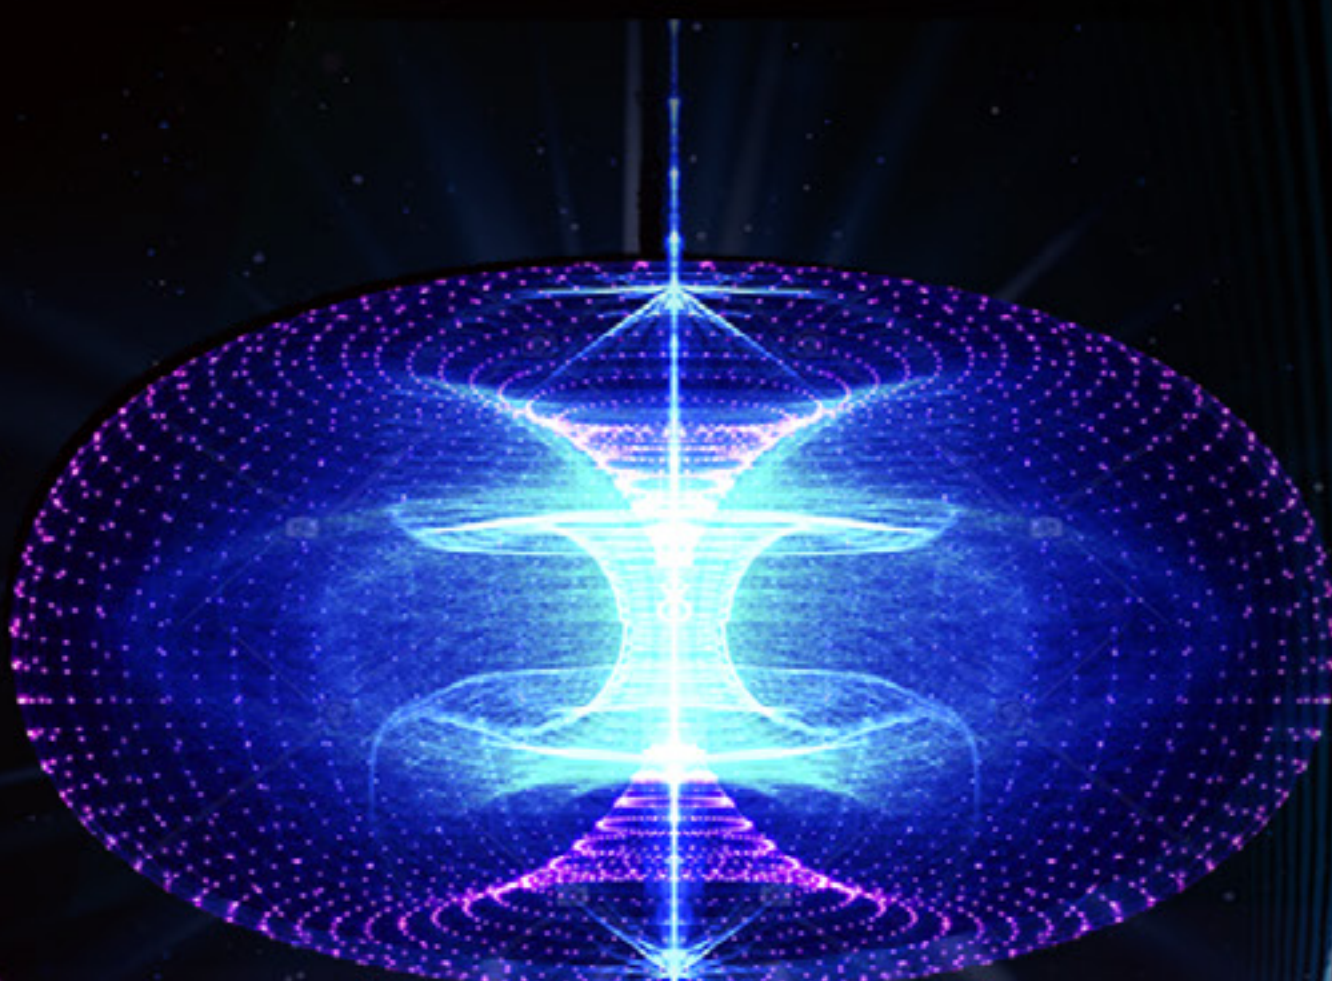

FOR WHOM: Available to all players worldwide. Expected to be of particular use for individuals & organizations involved in co-creating new paradigm projects.

ACCESS: Freely available for all aligned players. Tiered access following an alignment, education and agreement field onboarding process.

FUNDED: Individual parts self-funded by engaged partners. Technology build funded by Higher Status Global.

TIMESCALE: Build: in phases across 2023. Fully integrated first-generation V1: 2024

EXAMPLE USE: To locate, align & train with co-creators, and access resources and information to effectively manage projects and build communities.

PHOENIX FINTECH

WHAT: A high-performing automated trading software product and asset management system with capacity for substantial compound capital growth.

WHY: Specifically designed to operate in the multi-billion dollar global algorithmic trading market with the intention of transforming financial capital into living capital. Revenue will be utilized to finance environmental restoration projects, support breakthrough innovations and upscale ethical business operations to amplify and accelerate regenerative transformation.

DETAILS: A cloud-based algorithmic trading platform that uses logic formula, fractal geometry and rules-based methodology with cutting-edge AI to effectively predict and adapt to market movements across Crypto, FX and Commodity markets.

HOW: Designed by Higher Status Global. Constructed by software development company in Eastern Europe.

FOR WHOM: For Higher Status Global, Higher Status Foundation, Open World Alliance, Phoenix Fund, Gryffin Finance use. For the benefit of aligned ethical and sustainable organizations working to support planetary regeneration.

ACCESS: Accessible to clients demonstrating sustainable and ethical business standards according to measurable benchmarks.

FUNDED: By Higher Status Global.

TIMESCALE: Anticipated Completion: 2023.

EDUCATION & GAMING SYSTEMS

WHAT: The gamification of regenerative solutions and new earth operating systems.

WHY: To target and engage next-generation changemakers in gamified work projects, community development, education, media and events etc. To test real-life solutions for easy replication of regenerative ideas. To facilitate community organization and further online team-building. To enable access to resources and tools in diverse locations worldwide. To shift mindsets through gamifying complex ideas in fun, interactive and impactful ways.

DETAILS: Partner organizations are developing gaming systems using augmented and virtual reality technologies that will integrate with OWA tools for increased impact when systems go online.

HOW: Multiple systems designed by a number of organizations including Civil X and NextGen Software. These will connect in an interoperable ecosystem with OWA tools and other allies to develop a cooperative based platform to facilitate training, access to resources and hubs.

FOR WHOM: Available to all.

FUNDED: Partner organizations are currently self-funding. Funding will be made available for aligned projects through Higher Status Global once Phoenix Fintech is operational.

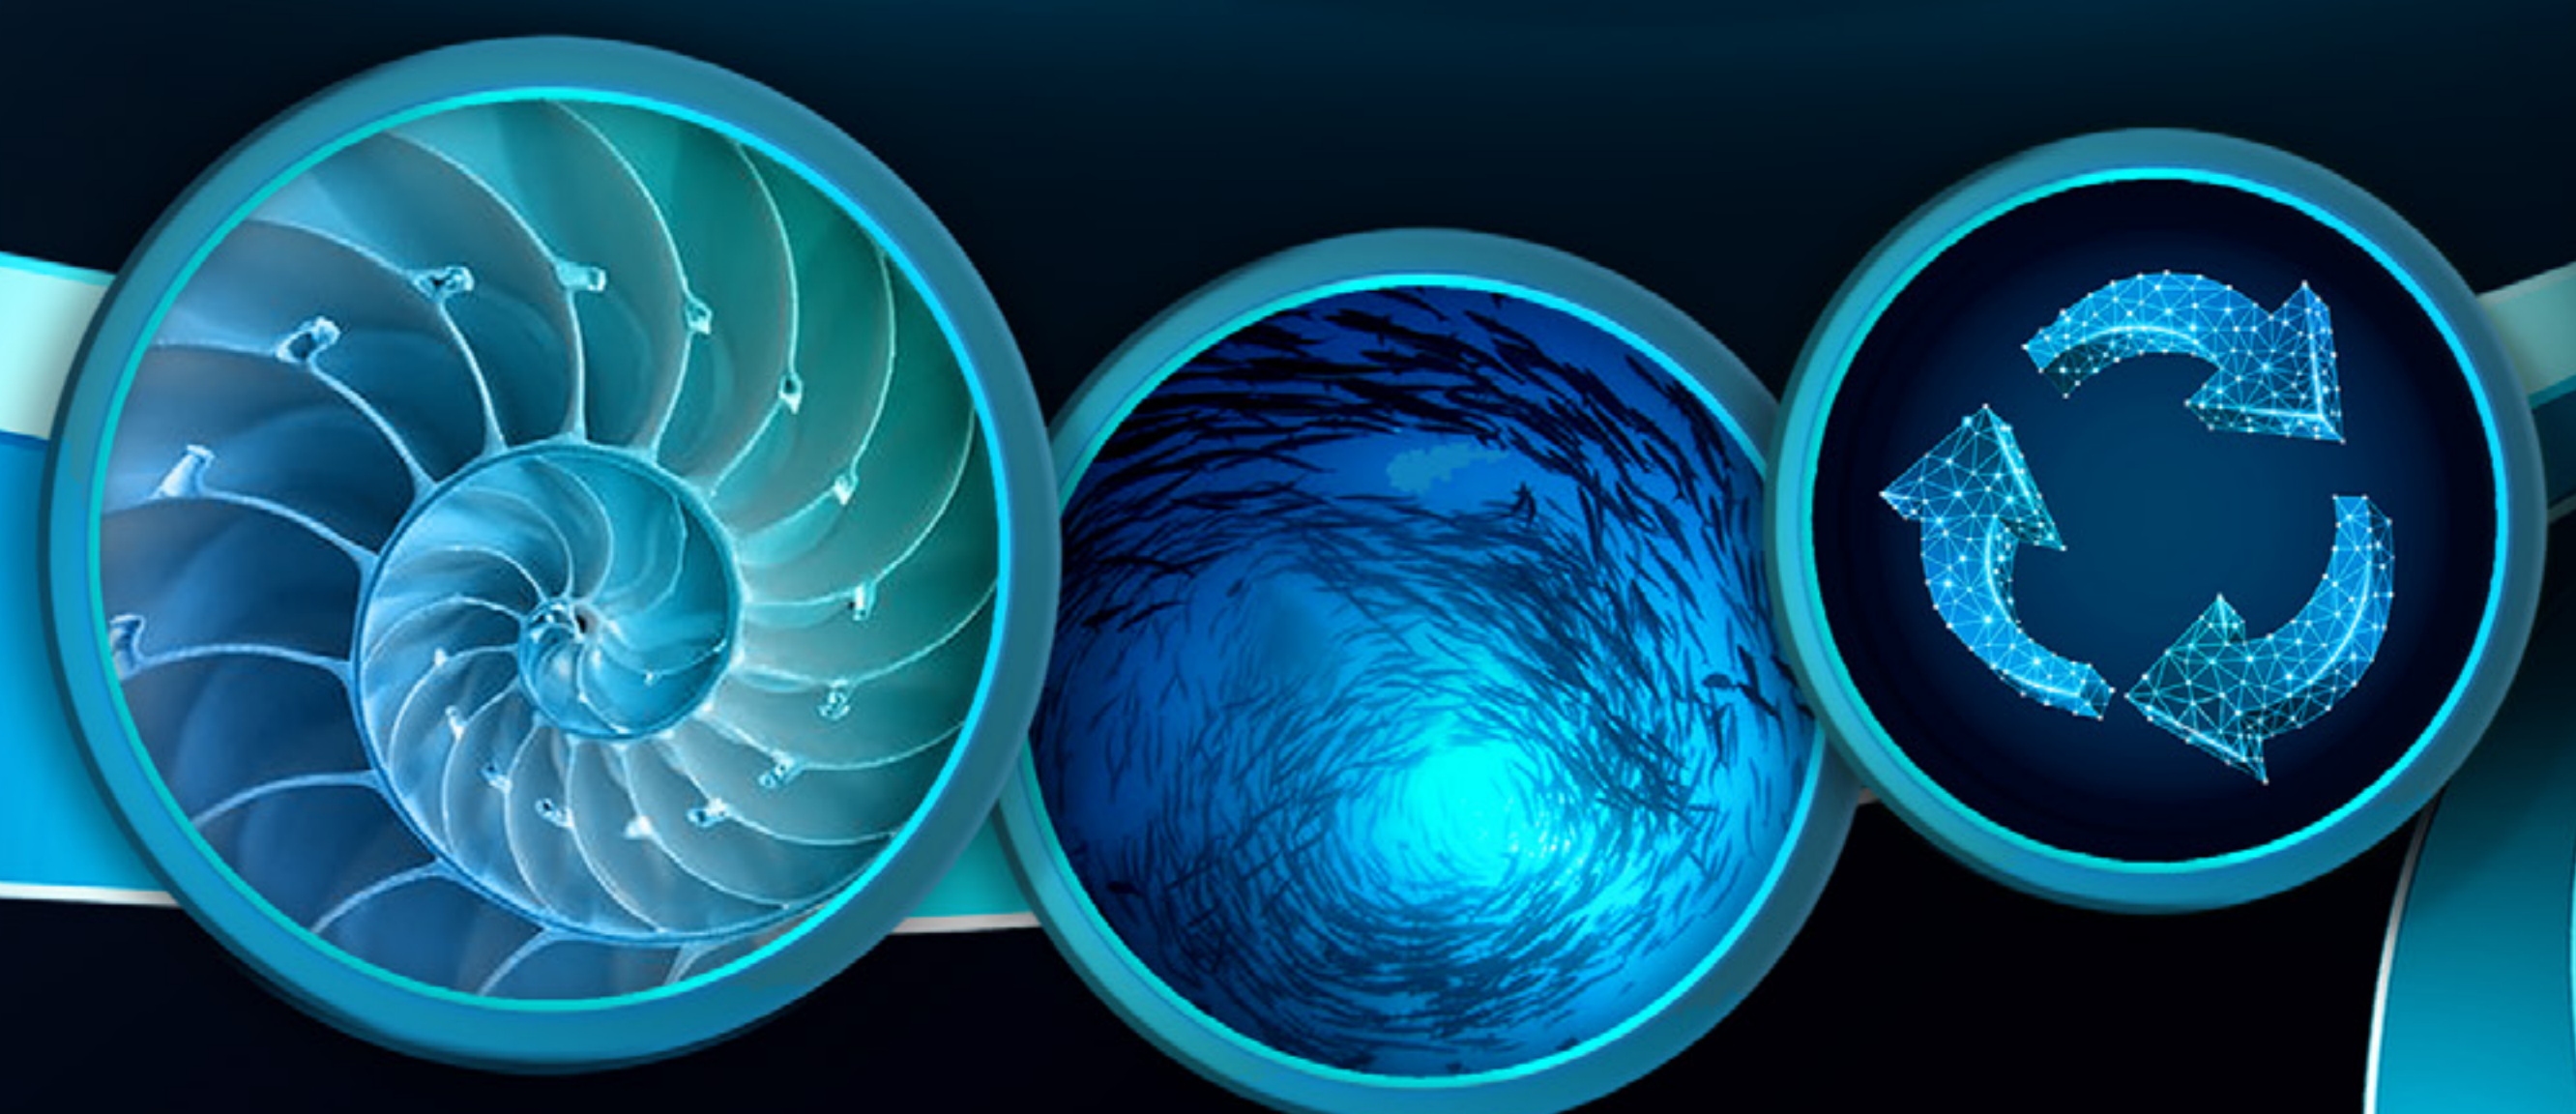

TIMESCALE: There are currently many projects under construction by various agents across the OWA network at different stages of development.

DELIVERY

OWA targets a diverse body of areas including: technology, economy, governance, environmental regeneration, renewable energy, enterprise, community, learning, planetary resilience and health amongst others, to address complex interconnected global challenges from a fully comprehensive lens.

There is no 'one size fits all' template in addressing these areas or producing these tools. Our evolving insights are incorporated into processes, tested and applied to real emerging issues, which feeds into our thinking and practice in a dynamic and adaptive cycle of learning, refinement and improvement.

Stages do not proceed in strictly linear fashion but are revisited in cycles and iterations, emulating the spiral and fractal-like qualities found in nature, allowing for the emergence of innovation before stabilizing structure and scaling.

DELIVERY OF STAGES

Our phased approach to project development progresses broadly as follows:

GROUNDWORK

ESTABLISHING PARTNERSHIPS

- First connections with individuals, organizations and networks across multiple disciplines.
- Exploring synergy and coherence through a dedicated onboarding process to form partnerships and establish agreements regarding decision-making, value sharing, data, asset, IP sharing, project stewardship etc. for effective co-creation.

PHASE 1

PROJECT PLANNING

- Designing, mapping and project planning of tools, products and processes from multiple lenses, (eg. technology construction, financial system, social architecture, community building etc.)

PHASE 2

PLATFORM CONSTRUCTION

- Building tools including: Synergy OS, OMNI OS Co-Creation Platform, Regenysis.Earth and Phoenix Fintech, ensuring interoperability and integration across systems where relevant.

PHASE 3

INVITATION & INTEGRATION

- Invitation to other individuals & organizations to contribute expertise in co-creation relevant to each aspect of the projects.
- Agents wishing to integrate wisdom, skills or resources will take part in an onboarding process.
- Onboarding at appropriate milestones and project phases to amplify collaborative efforts with maximum efficacy.

PHASE 4

IMPLEMENTATION & SCALING

- Projects developed through careful scaling by a process of iterations including: prototyping, stress-testing and implementation for specific issues; refining through practical application and feedback loops; applying to respective communities and gradual upscaling from local to global communities. The importance of maintaining coherence throughout is imperative.
- Larger-scale social programs (eg advocacy, campaigning) will be assessed, developed & implemented at appropriate stages ahead.

MEMBERSHIP

Until the OWA operating infrastructure is fully established, we will continue to network and build relations and resonance with aligned individuals, organizations and potential agents who may wish to draw on OWA services in the future.

Member services will operate informally through a variety of avenues (eg. 1:1 personal Zoom calls, Telegram Community Lounge threads, collaborative sessions etc.) until the OMNI OS Co-Creation Platform is in place to accommodate deeper integration and more involved participation.

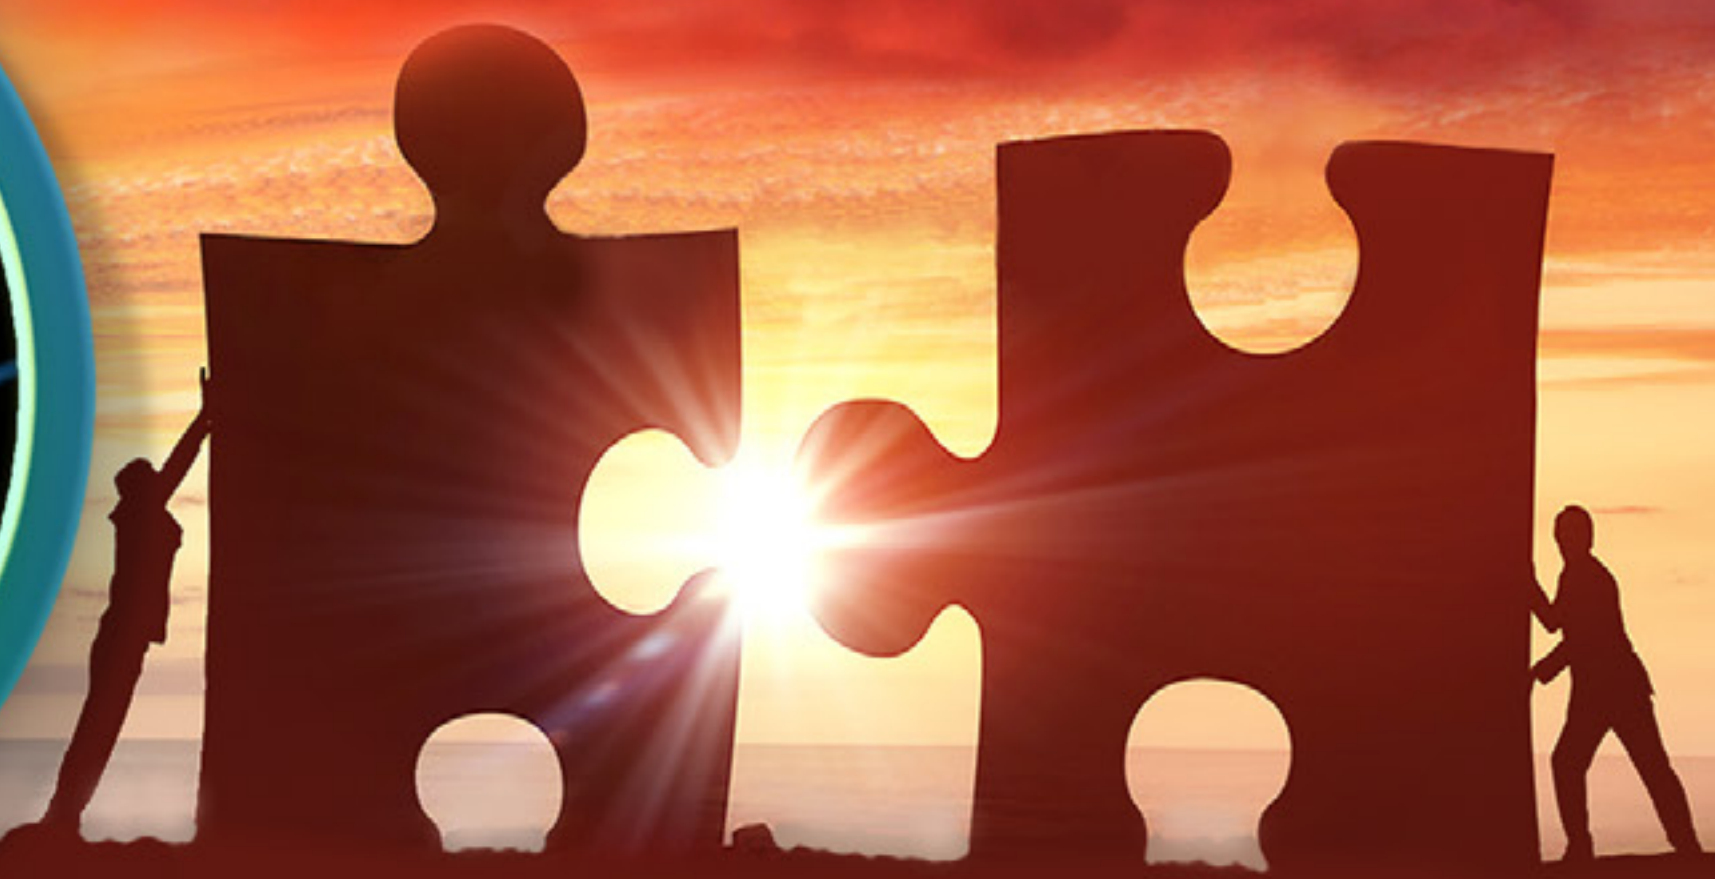

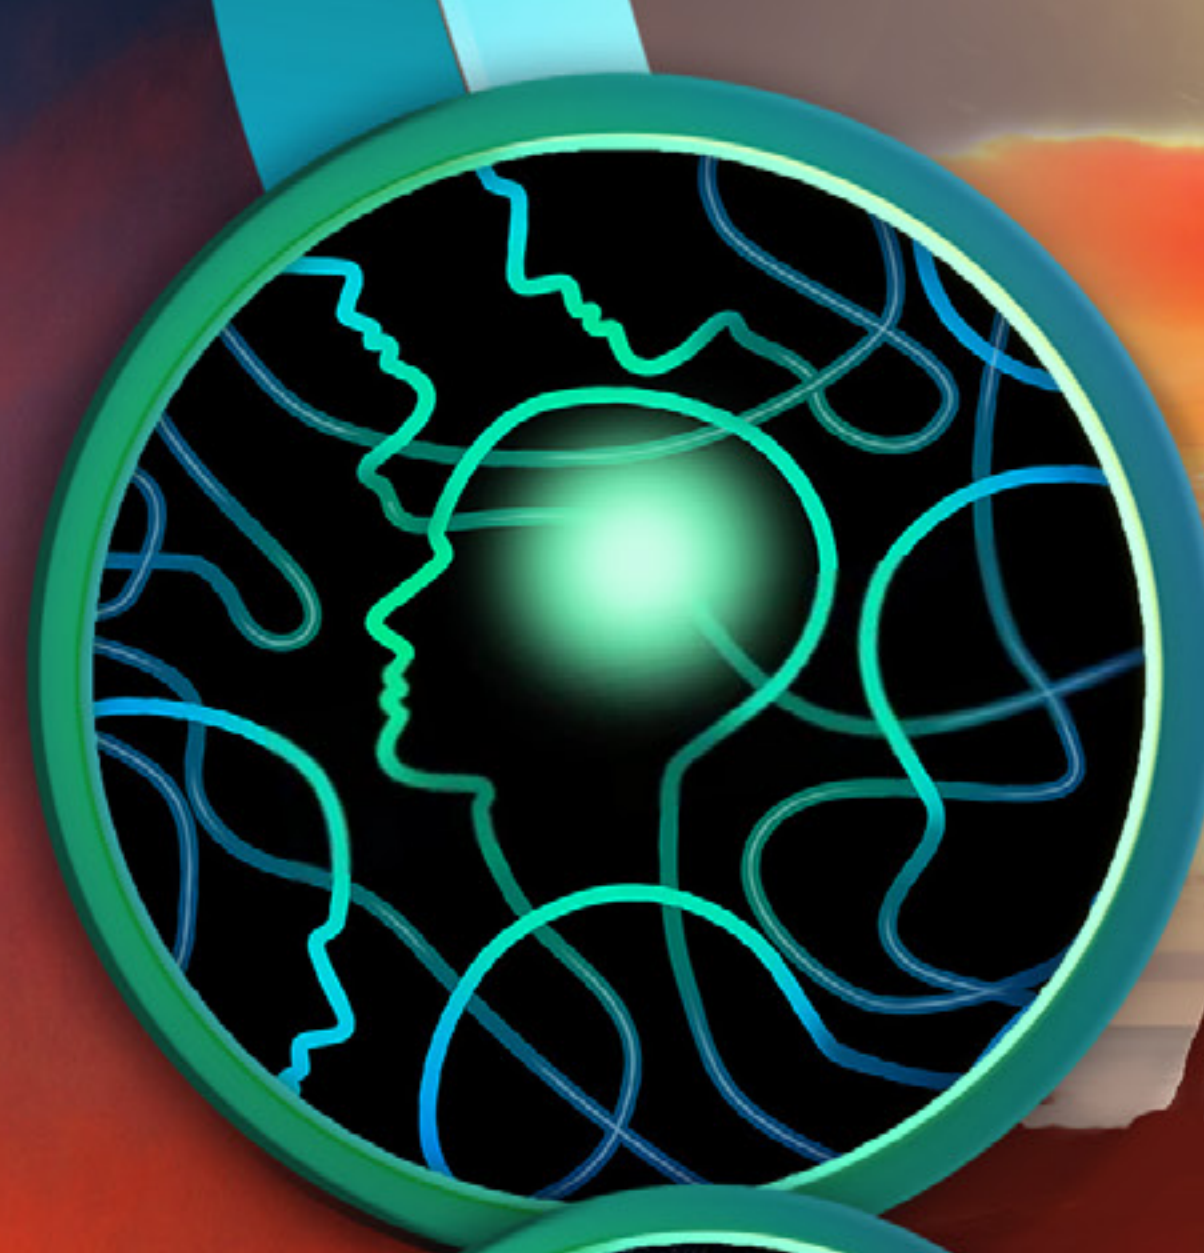

Agents' relationship with OWA at this stage constitutes an interim stepping stone towards actual membership once the onboarding process is operational. At this stage, agents will be invited to participate as members and offered support, access to resources, information, tools, networking opportunities and other benefits on their journey to greater sustainability.

CO-CREATION ONBOARDING

Agents wishing to access shared resources and services through OWA will be invited to undergo a dedicated onboarding procedure to support co-creation.

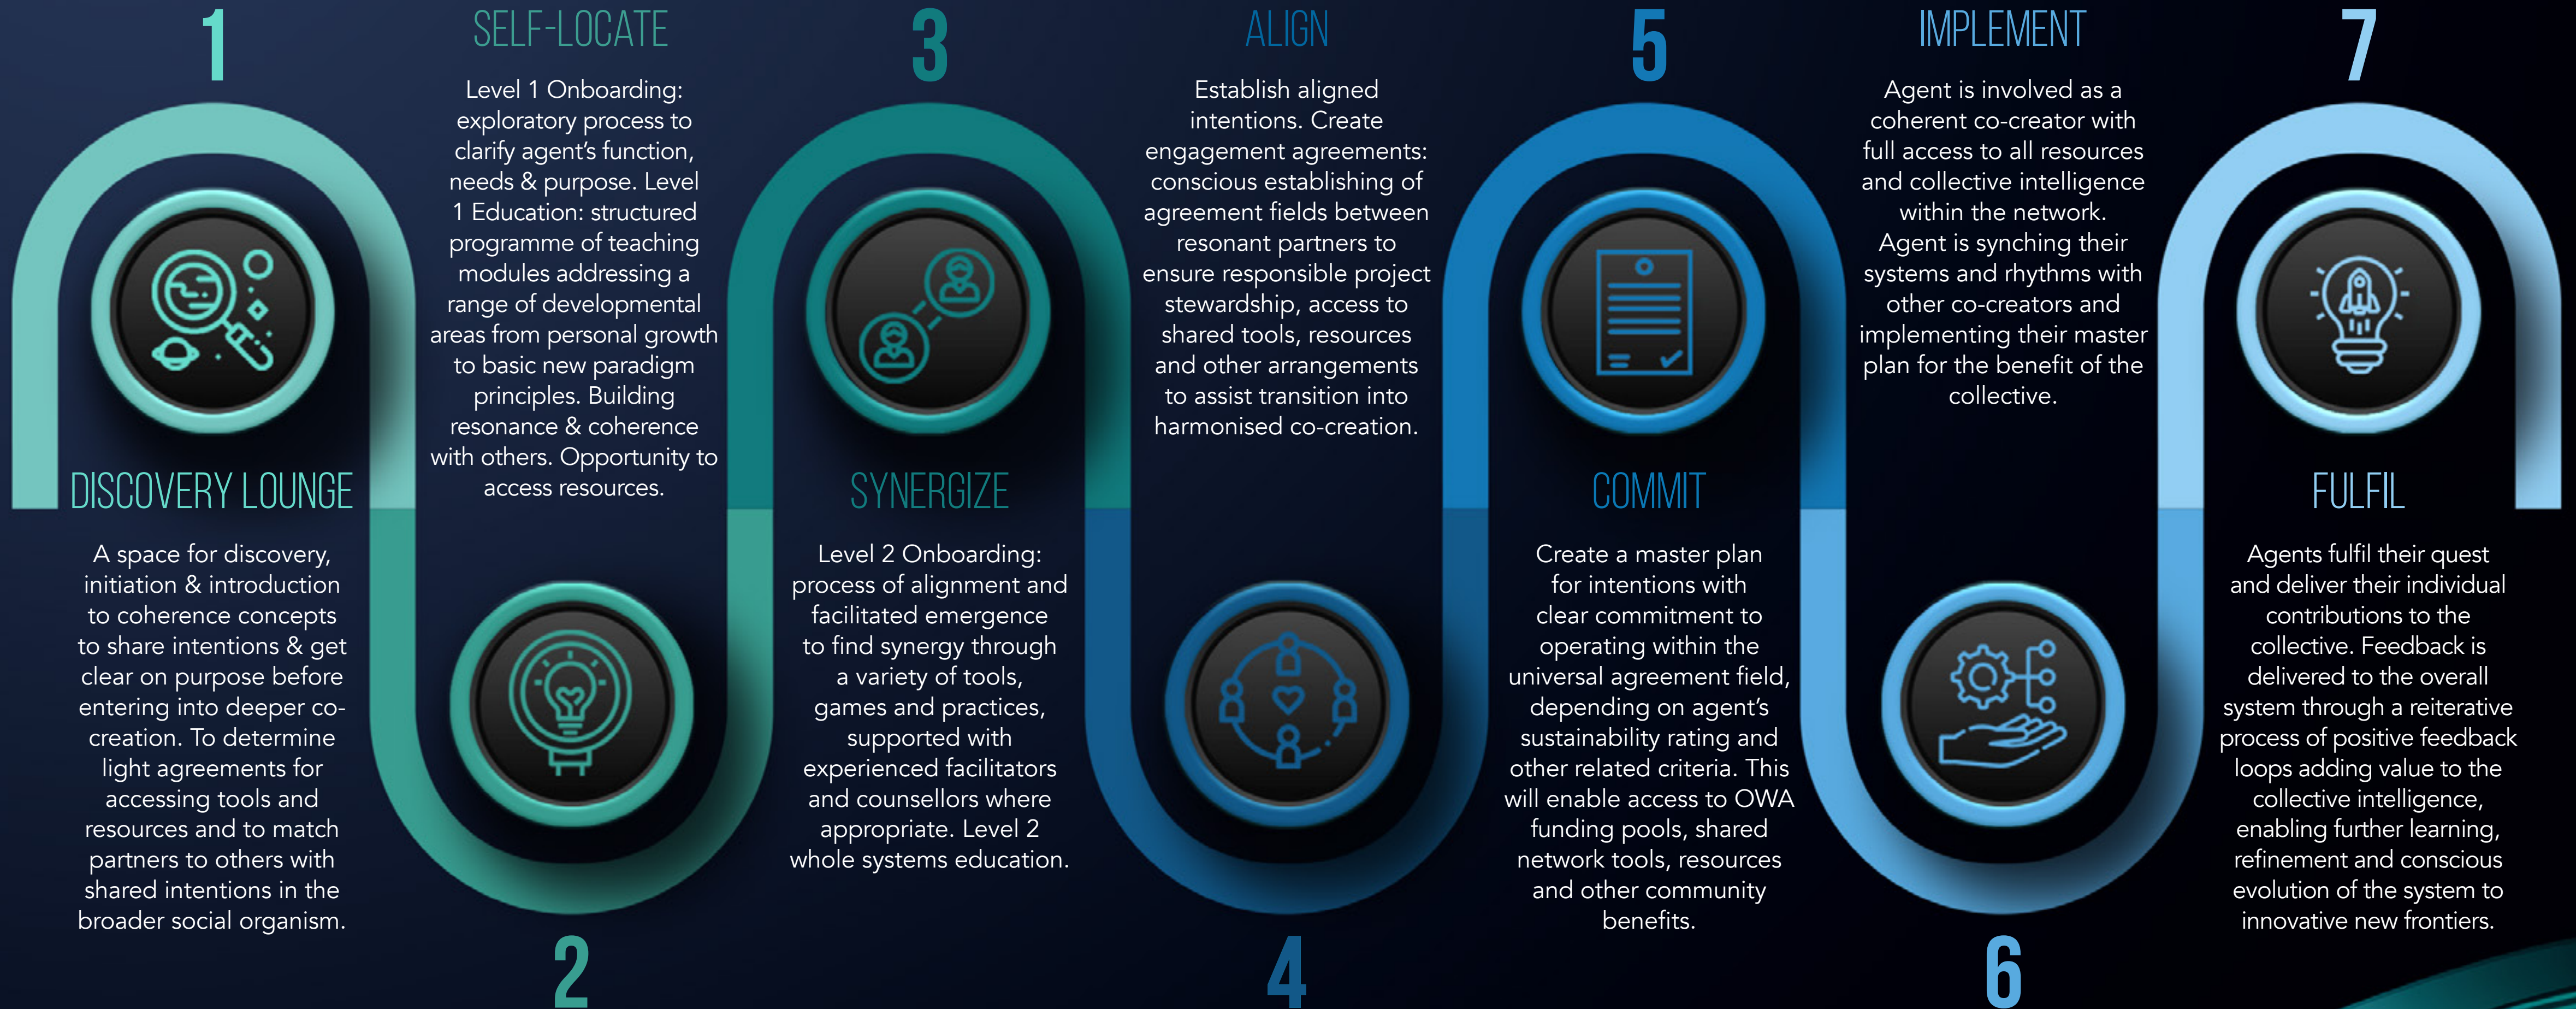

The act of co-creation between independent individuals, organizations and/or networks is a dynamic living process of interconnection. By engaging in a conscious process of integration, we can seek and discover solutions less likely to give rise to tension, misunderstanding, overlook critical connections or generate unintended consequences.

Through participating in a co-creation onboarding process, potential players can cross interpersonal, cultural and disciplinary lines to achieve a shared collective of greater understanding, meaning, intention, language and values to allow new avenues of evolution to emerge. This has the potential to synergize projects more powerfully in the wider context of a unified and harmonised field.

ONBOARDING SYSTEM

The system is being established by experienced OWA and seed partner community development facilitators. The process varies for individuals and organizations and broadly flows through the following stages:

Participation in the Onboarding System enables agents to better self-optimize, synergize and co-create more effectively. Members can then benefit from accessing shared resources, funding pools, tech platforms & tools and engage in other beneficial opportunities and actualization plans as part of a coherent and integrated system without losing their agency.

H I G H E R
S T A T U S
G L O B A L

O P E N
W O R L D
A L L I A N C E

ORGANIZATION STRUCTURE

OWA is looking to develop into a DAO in 2023 as an effective means of supporting the emerging collective commons.

FUNDING MODEL

OWA embraces a circular economy funding model, operating as a holistic whole-systems thinking venture ecosystem. It is funded through Phoenix Fintech revenue via sister organization Higher Status Global.

We support funding social and environmental solutions to restore and accelerate planetary regeneration at scale. OWA will establish funding pools through Phoenix Fintech in 2023/4 to help fund aligned co-creators' transition to a resource-based economy that embraces participatory access and contribution.

PHOENIX FINTECH FUNDING

Phoenix Fintech fuels the heart of our economic ecosystem. It creates new value transforming financial capital into living capital to support societal and environmental restoration. Once operational in 2023, revenue generated by Phoenix Fintech will support a number of opportunities through the following vehicles:

HIGHER STATUS GLOBAL

- Provides financial investment service to ethical organizations, assessed according to sustainability measures, to upscale their own financial resources, assist their regenerative impact and progress their journey towards greater sustainability.
- Donates significant proportion of revenue to fund Higher Status Foundation and Open World Alliance.
- Invests in companies, projects and initiatives that positively benefit society and environment and are best positioned to navigate the global shift towards sustainability (eg. breakthrough innovations, clean technologies etc.).

OPEN WORLD ALLIANCE

- Generates its own funds through Phoenix Fintech for business operational costs.
- Strategically allocates philanthropic grants to support new paradigm projects, organizations, breakthrough innovations and regenerative technologies that have the potential to scale up.

HIGHER STATUS FOUNDATION

- Strategically allocates philanthropic donations to support ecosystem regeneration projects that nurture planetary health resilience. Projects will be fully assessed for regenerative benefits and due diligence with the support of experienced specialists including Regenerosity and Re-Alliance.
- As a not-for-profit charitable organization, HSF will form strategic partnerships with other businesses and foundations to develop impactful opportunities.

OWA PROJECT ROADMAP

This is a 10 year project of comprehensive whole systems design that will develop in a phased approach. Core areas of work and approximate project timelines of OWA activities with current engaged partners include:

PHASE	PROJECT	ACTION	ENGAGED PARTNERS	OUTCOME	APPROX. TIMESCALE
PHASE I SEEDING	Phoenix Fintech R&D	Develop a high-performing financial tool capable of capital growth and finance restructuring.	Higher Status Global	Analysis, development and testing of robust strategies. Full Functional and Technical Specification Documentations produced.	2017-2020
	Phoenix Fintech Software and Web Platform Construction	Construct the automated software financial trading tool and web platform for software integration and account management.	Higher Status Global Software Development Company in Eastern Europe	Construction of cloud-based automated software trading tool and web platform.	Commenced: 2020 Completion: 2023
	OWA Formation	Establish an alliance of like-minded collaborators for effective transformative action.	OWA, HSG & multiple partners	Emergent collaboration of aligned allies.	February 2020
	OWA Community Lounge Group and working Project Groups	Activate a dedicated space to connect multidisciplinary players worldwide to share knowledge, mission intentions and facilitate collaboration.	OWA, HSG & multiple partners and collaborators	Introduction OWA communications group set up on Telegram. Multiple working project groups set up for specific fields.	April 2020
	OWA Development	Secure first wave network partnerships. Develop media and promotional assets.	OWA, HSG	OWA website, PDF and other media assets produced.	June 2020
	OWA Facebook Group	Activate community outreach with a wider inclusive space to connect multidisciplinary players worldwide to share knowledge and facilitate collaboration. To disseminate awareness through social media channels.	OWA, HSG & multiple partners and collaborators	Community OWA group set up on Facebook.	Sept 2020

PHASE	PROJECT	ACTION	ENGAGED PARTNERS	OUTCOME	APPROX. TIMESCALE
PHASE I SEEDING	Synergisation Process	Create alignment between seed agents to ensure coherence for most effective communication and project implementation.	OWA & other collaborators	Establishing coherence, agreement fields and project plans. Producing documentation.	2020 - present
	Fundraising	Source investments to support project builds, OWA operational costs and expansion.	OWA, HSG	Investment materials completed. Relationships with potential funders developed. Fund pitching. Fund negotiations underway.	2020 - present
	Synergy OS Framework	Phase I - Establish partnerships, project plans and agreement fields.	OWA	Establishing partnerships, developing stewardship agreements, determining tools, designing architecture and mapping multiple ecosystems.	2020 - present
	OMNI OS Co-Creation Platform	Phase I - Establish partnerships, project plans and agreement fields.	OWA	Exploring integration of all system aspects. Developing protocols & system architectural design. Project pre-planning.	2020 - present
	Regenysis.Earth	Phase I - Establish partnerships, project plans and agreement fields for project build.	OWA, Regenerosity, Unify, Regenerative Living Institute, SEEDS, Integrity.Earth & others TBC	Data mapping, ontology design, project implementation, UI design. Create agreement fields for data commons and agent invitation presentation.	2022 - present

PHASE	PROJECT	ACTION	ENGAGED PARTNERS	OUTCOME	APPROX. TIMESCALE
PHASE II BUILDING	OWA Web Platform for Regenysis.Earth integration	Design and build of fully integrated new OWA web platform as a portal to OMNI OS and Regenysis.Earth	OWA	In planning	2023
	Phoenix Fintech Software	Software operational	HSG	Software generates funding	Q2 2023
	Phoenix Fund Legal Structure	Assessing suitable legal structure to house Phoenix Fund	HSG, Amenti	In progress	2023
	Synergy OS Framework	Phase II - Project development	OWA & others TBC	Beta-Testing	2022 - present
	OMNI OS Co-Creation Platform	Phase II - Project build and invitation to multiple stakeholders for integration	OWA & others TBC	In planning	2023/4
	Regenysis.Earth	Phase II - Partner invitation	OWA, Regenerosity, Re-Alliance, Lush, Buckminster Fuller Institute, Wocat, Ecolise, Regen Institute & others TBC	In development	2022 - 2023
	Phoenix Fintech client onboarding	Accepting Phoenix Fund clients	HSG, Phoenix Fund	In planning	2023

PHASE	PROJECT	ACTION	ENGAGED PARTNERS	OUTCOME	APPROX. TIMESCALE
PHASE III DEVELOPING	Synergy OS Framework	Phase III - Build into 3D holonic, agent-centric architecture system and integrated into OMNI OS Co-Creation Platform	OWA & others TBC	To follow	2023 - 2024
	Regenysis.Earth	Phase III - Build, integration of bioregional information layers, satellite information and AI algorithms.	OWA, Darttek & multiple other partners & dataholders	In planning	2023 - 2024
	OMNI OS Co-Creation Platform	Phase III - Project build fully integrated with data architecture supporting multiple apps.	OWA & other system designers	To follow	2024 - 2025
	Funding	Create funding pools to seed projects for OWA Members	HSG, OWA, Phoenix Fund	To follow	2023
	Philanthropic Grants	Funding environmental restoration and breakthrough innovations to accelerate regenerative transformation.	Higher Status Foundation	To follow	2023/4
	OWA Member Onboarding	Invite coherent members to OWA through enrolment campaign and membership programme	OWA	To follow	2023
PHASE IV EXPANSION	Regenysis.Earth	Phase IV - Integration of data & gamification systems with other organizations	OWA, Civil X, NextGen Software & others TBC	To follow	2024
	All OWA Tools and Activities	Expansion of Networks Expansion of Community Learning Scalability of Programmes Global Media Expansion	Multiple aligned partners	To follow	Ongoing into 10 year plan

ALLIES

Open World Alliance is collaborating, co-creating or closely communicating with a number of allies and advisers in a dynamic process. Our network is growing and will continue to develop and evolve ahead.

CONTACT

We are keen to explore new ground and opportunities emerging at the intersection where technology meets sustainability. We believe in building networks that thrive through dynamic co-creation and invite connections with like-minded individuals and organizations interested in collaborating for the benefit of the collective.

We invite you to join our mailing list, Facebook page and Facebook OWA Community Group below.

OWA is actively addressing the UN's Sustainable Development Goals in developing integrated solutions for planetary regeneration with our partners.
